SuexecUserGroup Directive

Description:	User and group permissions for CGI programs
Syntax:	SuexecUserGroup *User Group*
Context:	server config, virtual host
Status:	Extension
Module:	mod_suexec
Compatibility:	SuexecUserGroup is only available in 2.0 and later.

The `SuexecUserGroup` directive allows you to specify a user and group for CGI programs to run as. Non-CGI requests are still processes with the user specified in the User directive. This directive replaces the Apache 1.3 configuration of using the User and Group directives inside of VirtualHosts.

> **Example**
>
> ```
> SuexecUserGroup nobody nogroup
> ```
